

THE
METEOR

Technical Equipment List

Auditorium

The Meteor is a flexible blackbox space, stage orientation can be in any direction.

There is a curtain track East – West in the centre of the room which allows it to be halved for a more intimate space.

The Lighting Grid is fixed bars. Can be supplemented with extra scaff.

Dimensions : Floor : 21M (North to South)
 19M (East to West)

Height To Grid : 5.29M

Seating

Seating capacity for the venue is dependent on sightlines and the orientation of the given production. A standard configuration would usually be:

4 x 21 seat movable bleaches on wheels

1 x ground row of 12 seats

Misc

Rechargeable Battery Operated Genie

12 x Small square tables

8 x Round tables

Small assortment of wooden and steel framed Rostra for staging.

Assorted Aluminium Scaff
